PROFESSIONAL SUMMARY

Computer Science Engineering (AIML) graduate with hands-on experience in full-stack and backend development, and building AI-powered applications using Python, FastAPI, React.js, and TypeScript. Experienced in designing REST APIs, authentication systems, and database-backed applications, with practical exposure to Retrieval-Augmented Generation (RAG) using LangChain and the Gemini API. Strong foundation in Data Structures & Algorithms, DBMS, Operating Systems, and Computer Networks, with a focus on writing clean, scalable, and maintainable code.

SKILLS

- **Programming Languages:** Python, JavaScript, TypeScript, SQL
- **Frontend:** HTML, CSS3, React.js, TypeScript, Tailwind CSS, Bootstrap, Responsive Design, Cross-browser Compatibility
- **Backend:** FastAPI, Flask, REST APIs, JWT Authentication, API Integration.
- **Databases:** MongoDB, Supabase, PostgreSQL
- **AI & GenAI:** LangChain, LangGraph, Retrieval-Augmented Generation (RAG), Recursive Text Chunking, Vector Embeddings (Gemini Embedding API), Prompt Engineering, Google Gemini API, ChromaDB, FAISS, Vector Databases, Large Language Models (LLMs)
- **Cloud & Deployment:** Git, GitHub, Vercel, Render, Git-driven CI/CD (Infrastructure-as-Code), AWS (IAM, EC2, S3)
- **Core Concepts:** Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks.
- **Soft Skills:** Problem-Solving, Team Collaboration, Communication, Time Management, Attention to Detail

EXPERIENCE

AI Data Annotation Intern, Synchro Serve Global Solutions

11/2025 – 02/2026

- Reviewed and validated datasets, maintaining accuracy and quality standards per structured annotation guidelines.
- Performed quality validation and documentation to support AI model development.

Graphic Design Intern, InAmigois Foundation

05/2025 – 06/2025

- Designed digital assets and user interfaces in Figma, collaborating with cross-functional teams.
- Managed multiple assignments while meeting project deadlines and quality standards.

PROJECTS

AI Developer Support Assistant (RAG SaaS), Tech: Python | FastAPI | React.js | LangChain | ChromaDB | Supabase | Gemini API

- Developed a RAG-based developer assistant using LangChain, recursively chunking technical documents (1000-character chunks, 200-character overlap) and generating vector embeddings via Google's Gemini Embedding API, stored in a ChromaDB vector store for semantic retrieval.
- Implemented secure REST APIs and backend services, enabling authenticated access to AI-powered query responses.
- Launched the application using Vercel and Render, with Git-driven CI/CD via Infrastructure-as-Code (render.yaml, vercel.json) for automated deployment.

Alex – Career Assistance AI Chatbot, Tech: Relevance AI | AI Workflow Automation | Prompt Engineering

- Created an AI-powered career assistant using Relevance AI, guiding users through resume creation, interview preparation, and job search support via a conversational interface.
- Developed automated AI workflows for resume generation and ATS optimization using prompt engineering.

WellHaven – Online Health Appointment System, Tech: React.js | TypeScript | PostgreSQL | JWT Authentication | AI Chatbot Integration

- Engineered a healthcare appointment platform supporting both patient and admin roles with secure JWT-based authentication.
- Architected backend APIs and database operations using PostgreSQL for appointment scheduling, booking, and dashboard display.
- Integrated a AI chatbot trained on the application as a knowledge base, embedded via JavaScript to assist users with platform guidance and information.
- Developed responsive user interfaces and shipped the application on cloud platforms.

EDUCATION

B.Tech – Computer Science & Engineering (AIML)

2022 – 2026 | Khammam, Telangana

Vijaya Engineering College, CGPA: 8.32 / 10

ACHIEVEMENTS

- Delivered multiple AI-powered and full-stack web applications, from design through deployment.
- Practiced DSA problem-solving across arrays, strings, linked lists, binary search, sliding window, stacks, and queues.
- Gained hands-on experience across REST API design, backend architecture, authentication, and database integration.

CERTIFICATIONS

- **Certified Frontend Developer** — HackerRank (May 2026)
- **Front End Development Libraries + Responsive Web Design** — freeCodeCamp
- **Certified Data Analyst** — Accenture (Forage)
- **Python Full Stack Training** — Knowation Learnings
